## New: Modified darkening solution– The REMIfront IV-M

### Excellent visibility when driving – Maximum privacy when taking breaks and holidaying

REMIS, the Cologne-based specialist in motor homes and caravans known for its clever accessory products, used the launch of the Renault Master model in 2010 as a springboard for reconfiguring its existing darkening system.

Reflecting the fair's new slogan "Ideas for smart caravanning", the single-piece screen system, which had already proved its worth in countless FIAT Ducatos, was now also adopted for the Renault Master and the Opel Movano (which has the same construction as the Master), from the 04/2010 models onwards.

Motor home fans can now expect to see two crucial adaptations to the new RENAULT Master product:

- The side screens now consist of just one single-piece darkening blind
- An intelligently designed front darkening section ensures that the system is easy to install, just as you would expect from REMIS

**Extremely simple installation of the front darkening section:** Thanks to a cleverly developed blind design, fittings such as the rear-view mirror, radio and sat nav equipment, which are permanently mounted in the driver's cab as standard, do not have to be removed when the front screen is installed. The top blind features cut-outs and its handle has a sliding element, which enables the fixed parts to be joined to the REMIfront IV-M system with no problem at all.

If the vehicle to be upgraded with this product is equipped with a rear-view mirror only, the REMIS scope of supply includes an additional blind, which covers the gaps left by the missing radio and sat nav devices.

**The REMIfront IV - Side screens now available for the RENAULT Master too:** In creating the one-piece darkening blind, the REMIS engineers have managed to significantly improve visibility when driving. There is no longer any centre bar to impair the driver's view. The high-quality and durable pleated blind is barely visible when closed up, thanks to a cover profile that has been fully coordinated with the Renault Master interior.

The side screens (now consisting of just one single piece) and the front darkening blind remain just as easy and convenient to operate as ever. Every system comes with a detailed, illustrated and easy-to-understand set of installation instructions.

This innovation will be available to view from 27 August, 2011, at the Caravan Salon fair in Düsseldorf (**Hall 13, Stand D33**) and to buy from wholesalers and specialist retailers from January 2012. REMIS is also ringing the changes online: Once the fair has begun, all the latest innovations and product developments will be reported in detail on the dedicated microsite to be found at [www.remimobil.de](http://www.remimobil.de).

Image 1: REMIfront IV-M - The latest Renault Master (04/2010 model onwards) with pleated darkening system. Those inside the motor home are fully protected from prying eyes.

Image 2: The smart and opaque REMIfront IV-M darkening system. Thanks to the single-piece side screens, now even easier to use.
